

# Dafferns' Sustainable Business Statement

At Dafferns, we are committed to running a sustainable business, prioritising the well-being of our people, our clients and the world around us.

As well as promoting good mental and physical health routines for our staff, we are dedicated to integrating eco-friendly practices in everything we do, from reducing our carbon footprint to promoting the use of sustainable resources. By championing these values, we strive to create a positive impact both within our firm and in our wider community.

We actively seek opportunities to innovate and implement green solutions that benefit our planet. Our commitment to sustainability extends to our workplace culture, where we encourage our team to embrace environmentally conscious behaviours and suggest ideas for further improvements.

At Dafferns, we are also deeply committed to social responsibility. We advocate for fair and ethical treatment of all individuals, fostering a diverse and inclusive workplace where every voice is heard and valued. Our dedication to people extends beyond our employees to our clients and the communities we serve, ensuring that our business practices contribute to a more equitable society.

Together, we can make a difference. By aligning our actions with our principles, we strive to lead by example, demonstrating that sustainable business practices are not only possible, but essential for a prosperous future.
